DETAILED ACTION

This is the first Office Action for application number 10/511,074, Receptacle Mounting Device, filed on 7/5/05. Claims 1, 3 and 6 are pending.

Information Disclosure Statement

The information disclosure statement submitted on 10/12/04 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the hooks", "the same side" and "the opposite side". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3632

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent Publication No. 2001/0035483 to Azevedo.

The patent to Azevedo discloses a receptacle mounting having a first and second plate support sections (13, 33) and a base section (11), a plate hook-resembling section (21), wherein the first and second support section and the hooks (25) are located on the same side and the hook resembling section is located on an opposite side of the first support section, wherein the second support section is a hoop (13).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following documents show various receptacle holders
